

Suppliers of Scaffolding for Trade, DIY and Self Build

About Us

Scaffolding Supplies Limited provide a professional service, supplying and delivering all the materials required to scaffold any project, from DIY to self build and trade contracts.

For people planning self build projects, whether it be an extension or a full house build, we offer easy to construct scaffold systems and are happy to advise on their use. You submit your plans, we calculate exactly how much equipment is required to safely complete the project, an itemised quotation is issued and on delivery we will provide you with a colour coded plan of 'what goes where', along with an erection guide.

With over 25 years in the construction industry supplying scaffolding and access related equipment, we pride ourselves on our ability to locate any scaffold or access related item. We carry large stocks of most items and our full range can be found on our website, but if in doubt, please just give us a call.

Unique Delivery Service

We are based in Grimsby on the East Coast of England, an ideal location for deliveries throughout the UK and worldwide. We deliver using our own vehicles, which range from 44 Ton HGV with forklift off-load facility, to small vehicles capable of reaching locations with restricted access. We offer the same unique service to European locations and have regular deliveries to France. A full export service, loading containers at our premises for shipping to worldwide destinations, is also available.

Conventional Scaffolding

Conventional scaffolding equipment consists of tubes, boards and fittings, which are utilised to create a structure to allow workers to construct, renovate or repair a building. It is used to form an independent scaffold of virtually any shape or size. Longer lengths of tube are used to form the standards and ledgers, whilst 1.5m lengths form the board bearing transoms. The various types of scaffold fittings are used to form the joints. Scaffold boards must be supported every 1.2m along their length and the whole structure is then tied into the building using either ties or tube braces etc.

Single Coupler

Double Coupler

Swivel Coupler

Girder Clamp

Joint Pin

Double Coupler

Band and Plate

Putlog Adaptor

Single Coupler

Conventional scaffolding is usually only erected by qualified scaffolders and we would recommend that only someone who is competent should use this equipment.

For our full range visit our website www.scaffolding-supplies.co.uk

Tube and Boards

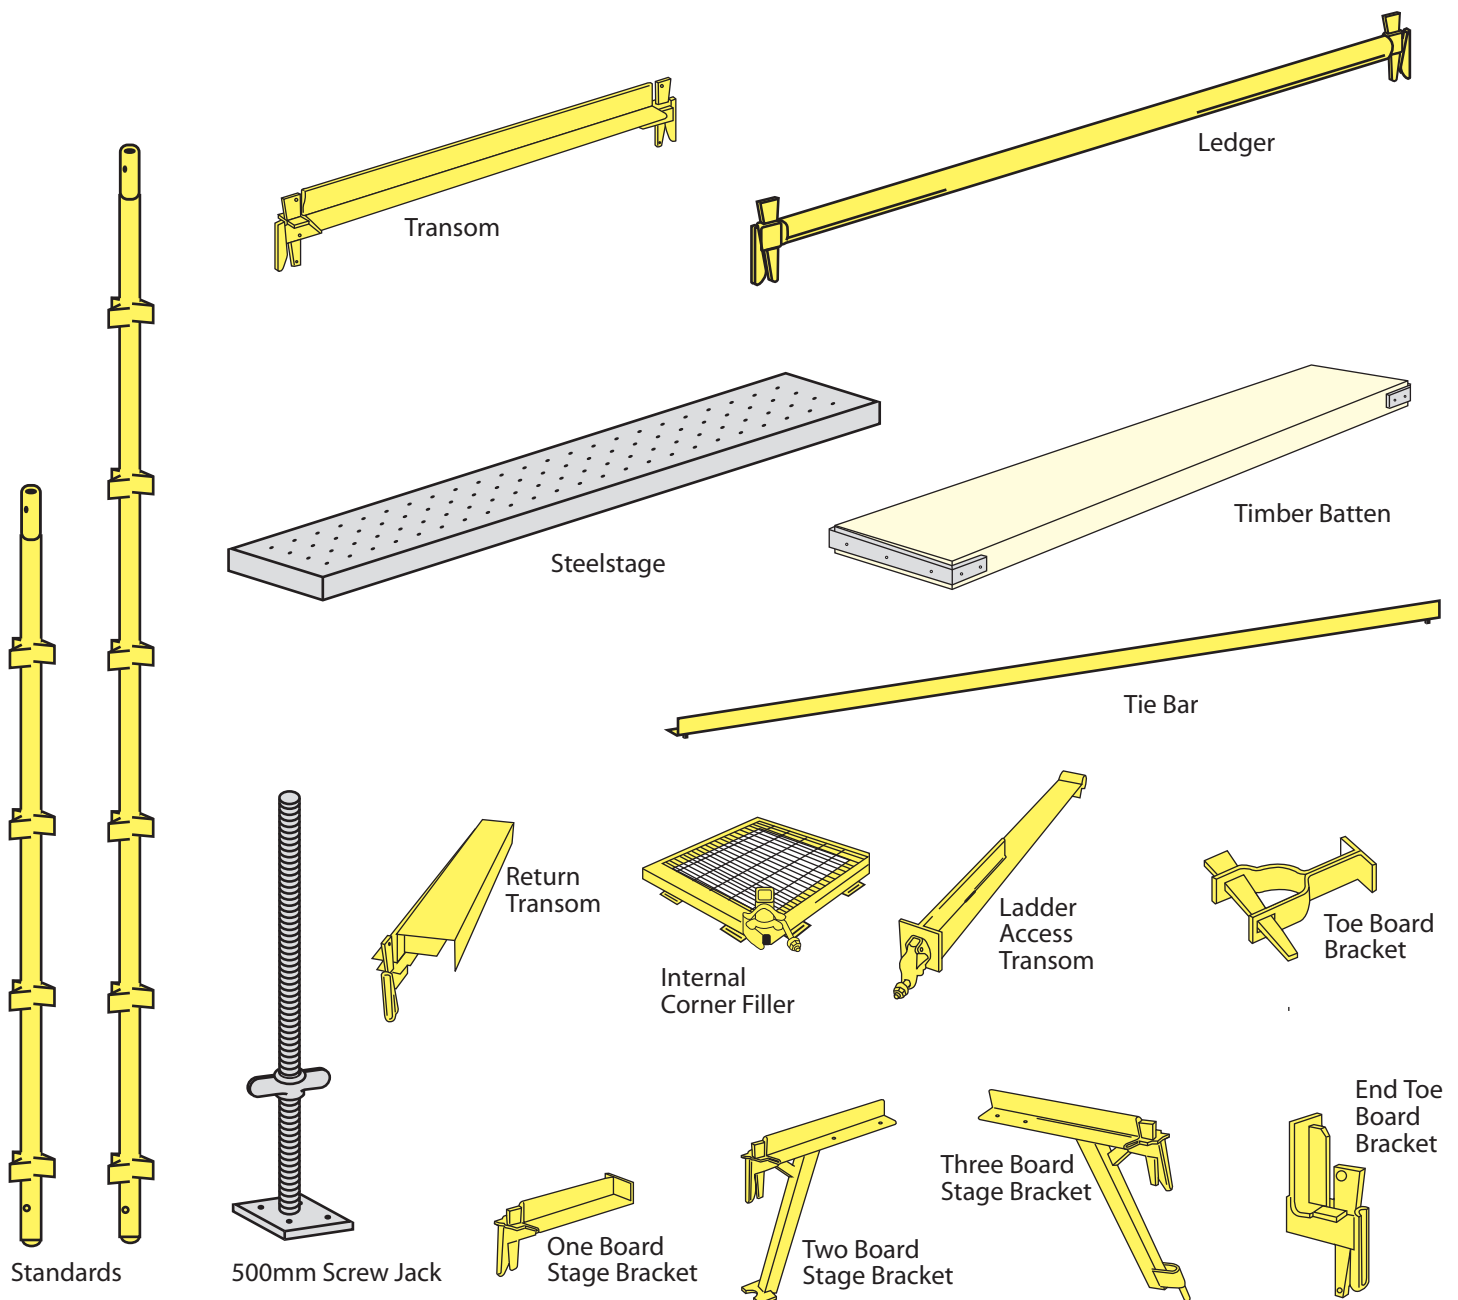

Kwikstage Scaffolding

Kwikstage is manufactured to the same high standards as conventional scaffolding and can be erected to any combination of platform height and length, subject to correct erection procedure.

Kwikstage, is a painted, grid based scaffold system, which is quick and simple to erect. Adjustable screw jacks are used to create a level structure. Ledgers and transoms have captivated wedges, which when hammered into the "V" pressings on the standards, form a rigid joint.

Battens are placed between transoms to give a clear span bay. Narrow transoms are available for tight, hard to access areas. Diagonal braces are fitted to the outside of the scaffold to stop any lateral movement.

We stock a full range of kwikstage equipment, both new and used, details and prices are shown on our website. www.scaffoldingsupplies.co.uk

Scaflok Scaffolding

Scaflok is fully compatible with SGB Cuplok, both of which are a similar type of system scaffold to Kwikstage. Scaflok is a galvanised metric scaffold system, based around 2.5m and 1.8m bays, with a depth of 1.3m. Unlike Kwikstage, Scaflok can be used with either standard conventional scaffold boards and intermediate transoms, or Omega battens and Omega transoms, the latter being the most common for construction companies and self builders. Standards have a 'cup' arrangement, into which the ledger blade is located, the ledgers / transoms are then secured in place with a single twist action.

A full range of accessories are available for Scaflok, from stage brackets and return devices, to loading bay transoms and bridging ledgers.

Scaflok is used by builders that want to leave an impression. The galvanised finish protects the equipment and maintains its new appearance. We stock a full range of accessories, details and prices are shown on our website. www.scaffolding-supplies.co.uk

Ancillaries

We stock a full range of scaffolding ancillaries, from ladders and brick guards to acrow props and builders trestles. Scaffold tools, from belts and tool holders to top of the range titanium spanners.

We also stock debris netting and plastic sheeting, flameproof or standard.

We carry a huge stock of tube clamps which are ideal for constructing handrails etc., these clamps easily connect standard scaffold tube together by use of an allen key.

Builders Trestles Size: 1,2 and 3

Scaffolders Tool Kit

Fitting Bolt Caps

Hilti Ring

Access Trapdoor

Fencing Accessories

Tubeclamps

Safety Systems

Most ancillaries and accessories are available to purchase via our website and are usually despatched for next day delivery.

“ Dear Scaffolding Supplies

Just to let you know that my order arrived this morning, as promised.

Thanks again for the kind of efficient, friendly and professional service that one can only expect from a family run firm.

Exactly as described on the website. ”

*Kind regards
Mark Caldwell*

“ On behalf of Cutty Sark Enterprises Ltd I'd like to thank you for the impeccable service you have provided over the last 3 years.

All our requirements have been met efficiently and delivered the very next day.

I would highly recommend using Scaffolding Supplies, especially if you want 1st class friendly customer service along with competitive prices.

I'd like to personally thank Jenny who has insured our needs are fulfilled during busy times in a highly professional and efficient manner ”

Alan Elson.
